

Young statistical research in Denmark

Young Statisticians Denmark (YSD)

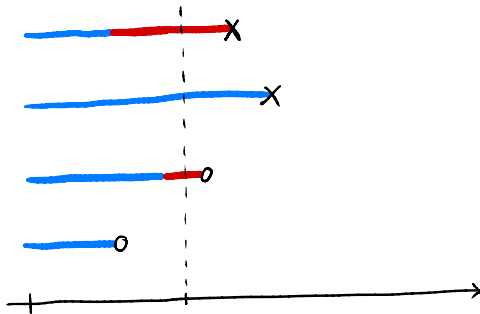

DSTS 50 years anniversary – November 17, 2021

Efficient estimation of target parameters in multi-state models

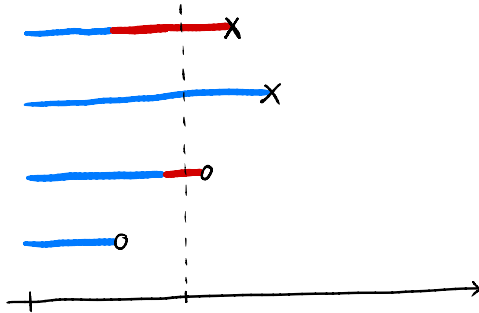

Efficient estimation of target parameters in multi-state models

Efficient estimation of **target parameters** in multi-state models

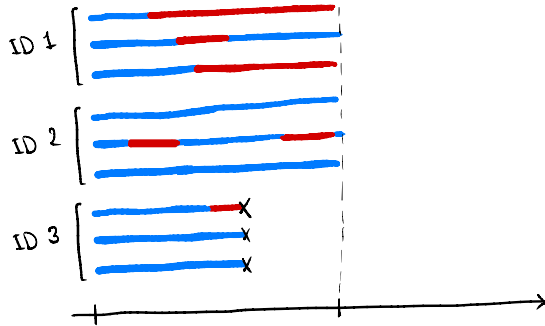

Efficient estimation of target parameters in multi-state models

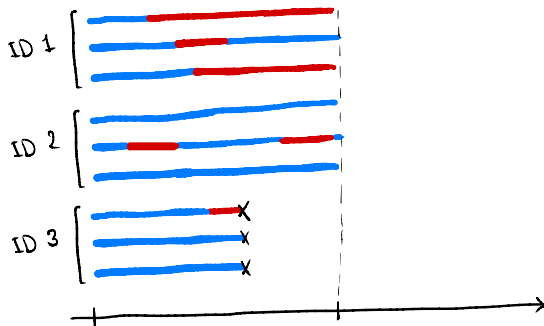

- Non-parametric efficiency theory → machine learning and inference

Efficient estimation of target parameters in multi-state models

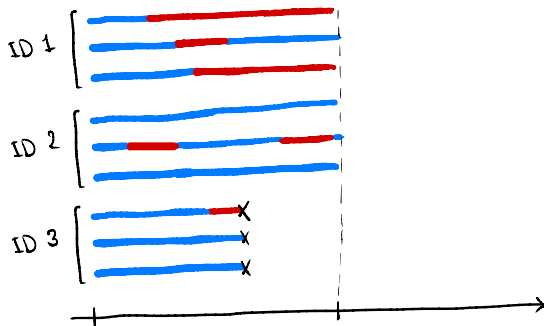

- Non-parametric efficiency theory → machine learning and inference

Efficient estimation of target parameters in multi-state models

- Non-parametric efficiency theory → machine learning and inference
- "Sensible/meaningful" causal questions in this setting?

Efficient estimation of target parameters in multi-state models

- Non-parametric efficiency theory → machine learning and inference
- "Sensible/meaningful" causal questions in this setting?
- Non-parametric estimation of conditional hazard functions?
